

FAILURES OF THE INSTITUTIONAL ENVIRONMENT RELATED TO THE WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT MANAGEMENT

Shteryo Nozharov ¹

Abstract

The main objective of the study is to analyze the failures of the institutional environment related to the waste electrical and electronic equipment management. As a result of the research, there will be proposed measures for improving the rules, used by the responsible authorities in order the environment to be protected. This action is necessary to be implemented without establishing burden for the business in the process of waste management. The interdisciplinary approach, including elements of both economic analysis and institutional normative analysis, will be used.

Key words: waste; institutional environment; interdisciplinary approach
