

**ECONOMIC EFFECTS ON HOUSEHOLDS IN BULGARIA IN THE
CONDITIONS OF COVID 19**

Vanya Stoyanova¹

Summary:

The article deals with the economic effects on households in Bulgaria in the context of COVID 19 – the crisis. The link between the economic categories and the statistical indicators used to measure household unemployment, income, consumption and savings is revealed. There are assumptions about the change in certain economic indicators. On the basis of a descriptive analysis of dynamics, an attempt is made to reveal the economic effects on households.

Keywords: unemployment; incomes; consumption; saving

JEL: E21, J01
