

**CARING FOR CHILDREN IN EARLY CHILDHOOD AS A FACTOR FOR
RECONCILING OF WORK AND PRIVATE LIFE**

Maria Mancheva¹

Abstract:

Reconciling of work and private life and gender equality are two of the principles of the European Pillar of Social Rights. The balance between work and family is becoming increasingly difficult to achieve in the context of rapidly evolving technologies, the need to increase digital skills and knowledge, adaptation to new realities in social and economic life. Providing quality care and education for children in early childhood enable parents to better realize themselves in the labor market.

Keywords: child care; combining professional and personal
life; work-life balance
