

THE DIGITAL TECHNOLOGIES AND CHALLENGES OF THE EUROPEAN
UNION'S POPULATION

Desislava Koleva-Stefanova ¹

Abstract:

Current issues related to the rapid penetration of digital technologies and the challenges posed by digitalization in every area of modern life are covered in the study. Based on the review of European documents and the survey conducted on the use of Internet services and the level of digital skills of the EU population, some conclusions and recommendations for the positive impact on the development of digitalization in all spheres of public life have been identified.

Keywords: digital technologies; digitalization; internet; skills; competencies;
