

**ECONOMIC POLICY UNDER THE HEALTH AND MILITARY
CRISES' PRESSURE – MASTERING THE EXOGENIC SHOCKS**

Shteryo Nozharov¹, Petya Koralova – Nozharova²

Abstract:

Since 2020, exogenic (external) shocks began alternating, which fact influences both the business cycle and the economic growth rate. After the continuous COVID-19 pandemic, which devastated the national economies, a military conflict in Europe. This imposes that the Bulgarian economic policy needs to be urgently reconsidered and the main accent to be put over its respond to exogenously caused crises and achievement of catching-up economic growth.

Keywords. economic policy; exogenic macroeconomic shocks; business cycle
